Madison, WI 53707-7921

Dear Ms. Praedel:

The purpose of this letter is to respond to your request for concurrence with the siting recommendation for a sulfur dioxide (SO₂) air quality monitor near the Expera Specialty Solutions facility located in Kaukauna, Wisconsin. The monitor is being sited in response to the designation process detailed in EPA's Data Requirements Rule (DRR) for SO₂.

We have reviewed the June 2016 SO₂ DRR Air Quality Monitoring Plan document and, based on the air quality modeling conducted by the facility, agree that the best location for a monitor is north of the Expera facility boundary. The location is represented by the area labeled "Primary Candidate Area" on Figure 5, on page 17 of the aforementioned document.

While this letter confirms our agreement that a single monitor in this area is acceptable based on air quality modeling conducted in accordance with EPA's Monitoring Technical Assistance Document, this letter does not confirm that the proposed site will meet each of the monitor siting requirements specified in 40 CFR part 58 Appendix E. Prior to beginning installation, WDNR should evaluate and ensure this site will meet those criteria and provide Region 5 with the results of your monitor siting assessment showing that all criteria will be able to be met at this proposed location.

Thank you for the advanced coordination on this issue. If you have any questions or need additional information, please contact Randy Robinson at 312-353-6713 or Jacqueline Nwia at 312-886-6081.

Sincerely,

Michael Compher
Chief
Air Monitoring and Analysis Section
